OPIS PRODUKTU

6MP diagnostic color display system

4th generation Fusion display

Clever image-enhancing features

With toolset to spark productivity

The first-ever Fusion display on the market and already in its 4th generation. That's Corionis Fusion 6MP. This multi-modality diagnostic display system comes with clever image-enhancing features, boosting productivity and viewing ergonomics.

Redesigned to push productivity

Corionis Fusion 6MP features the latest exclusive IPS-Pro LCD technology, bringing perfect images under any viewing angle to ensure a screen area that is 100% ACR compliant. It also offers uniformity correction on the pixel level (PPU) to eliminate screen noise. Add to this the brighter calibrated luminance, and you'll be able to see subtle details quicker, requiring less zooming and panning when reading images.

To further boost productivity, Corionis Fusion 6MP comes with some of Barco's unique productivity tools. With stunning SpotView™ technology, you can focus the light on lesions or abnormalities that require extra attention. And DimView™ automatically dims the auxiliary displays used for patient worklists or dictation, so you can keep your focus on the details that really matter.

A pleasure for your eyes

The latest design is smarter and lighter to match the ergonomics of your reading room and to allow for easy display manipulation. What's more, reflection of the front glass has been further reduced, which is exactly how Corionis Fusion 6MP helps reduce eye strain.

With I-MST (Intelligent Multi Sensor Technology), front-of-screen, backlight, ambient light and temperature sensors work together seamlessly to optimize image quality and to keep it consistent over time.

Proven performance

Proven to increase productivity by up to 19% compared to a dual-head 3MP set-up (see Montefiore study) and lauded with the Frost and Sullivan product line strategy award, Coronis Fusion 6MP has become Barco's flagship product, with thousands of units installed in over 70 countries worldwide.

A one-stop-shop solution

Barco medical displays include proprietary display controllers that are validated with the latest workstations and with all major PACS applications. They also include seamlessly integrated technologies and features to boost functionality and performance.

Like all of Barco's medical display systems, Coronis Fusion 6MP comes with MediCal QAWeb, a cloud-based technology for automated calibration and Quality Assurance to ensure maximum uptime of the display.

This product is not yet commercially available in the United States.
