MatrixPRO-II 3G/HG/SD-SDI series High-speed 3G serial digital routers

Cena

0,00 zł

OPIS PRODUKTU

Barco's MatrixPRO-II SD/HD/3G-SDI series offers three models of high-speed serial routers: 8x8, 16x16 and 32x32. All three models are compact, have an extremely slim profile, are cost-effective, and provide an excellent solution for applications where budget and space are at premium.

Featuring genlock input

All routers support SDI formats from SD formats to 3G/HD. Their superior design allows for image switching and signal distribution without artifacts. They all feature a genlock input with loop through, ensuring that all switching is synchronized with the house sync.

Flexible control

The routers can be controlled from the front panel, RS-232, Ethernet connections or the Encore and ScreenPRO-II presentation systems. Barco's MatrixPRO-II SDI router series allows a single unit to be subdivided into multiple layers.
