OPIS PRODUKTU

Barco's OverView OL series LED-lit video walls are the first choice for 16:9 mission-critical control rooms that require a guaranteed uptime. The modules' high level of redundancy, not only of the individual LEDs, but also of the LEDs' power supplies and even inputs, ensures nothing can go wrong, giving users the peace of mind they need. Featuring a structure that can be tailored to the requirements of the customer, the OverView OL series knows virtually no limits in size.

Ultimate peace of mind

The OverView OL-521 video wall modules have been designed for an entirely maintenance-free operation over several years, without any need for consumables. Barco's unique liquid cooling system ensures lower LED temperature, resulting in longer LED lifetime (>80,000 hours in eco mode).

Displaying the sharpest and most saturated colors in full HD resolution (1920x1080), the OverView OL-521 offers an ergonomically excellent viewing experience. The availability of alternative screen types makes sure you can adjust the video wall to your specific needs in terms of viewing angle and brightness.

Always the most optimal picture

OverView OL series video walls come with Sense6, Barco's unique sensor technology that provides brightness and color stability over time and across the entire display. Sense6 continuously measures brightness and color by means of a high-quality spectrometer, and adjusts the color space to provide an image that is most convenient for the human eye. This means that no maintenance or manual adjustments are needed. The colors can also be adjusted to the very specific needs of TV cameras, making the OverView OL series suitable for backdrop applications.

Award-winning design

The OverView OL series' design, combining usability with style, has been lauded with the prestigious Red Dot Design Award and was nominated for the German Design Award. The individual modules have the smallest depth on the market today, allowing to build the most shallow video walls possible. This

makes the OverView OL series the product of choice for installation in confined spaces.

Features

Highest level of redundancy

6x redundancy of LEDs (per color) & LED power supplies

2x redundancy of dual-link inputs

Unique Barco innovations

Sense6 automatic full spectrum calibration

Active liquid cooling

Excellent viewing ergonomics

Wide LED color gamut

Full HD resolution

No color break up

Excellent off-axis viewing with next-generation screen types

Maintenance-free

80,000 hours LED lifetime in eco mode

5 years service-free runtime

No color wheel needed

Green focus

No wearing parts, no waste

No mercury lamps needed
