Nazwa **Projektor Barco Hdx-W12**

Cena **0,00 zł**

OPIS PRODUKTU

With the HDX series, Barco brings its expertise in 3D projection to events. The HDX-W12 combines active 3D with wireless control options in one unit. Barco's expertise in the events market with the FLM series has added considerably to the design of this projector, while it also shares image processing and Athena™ scaling technology with Barco's benchmark image processing technology. Its sturdy, compact design allows the HDX-W12 to be ready for the road in no time, while its 12,000 lumens light output and 3-chip DLP color quality ensure crisp, vivid imagery on any screen.

Quick preview and wireless control

The HDX's built-in color LCD screen provides you with all the information you need on your projector's status and also allows you to preview your connected sources. The projector has a native 3G HDSI/SDI input, which makes it compatible with progressive sources over a single BNC cable. Featuring wireless control, you can operate your HDX from your smart phone or tablet computer.

Simple setup and maintenance

Featuring just five building blocks, the HDX-W12 was designed with efficiency and quick setup in mind. In addition, it can easily be boxed, shipped and fits into standard flight cases. The HDX-W12 comes with a Xenon lamp that offers a 2,500 hours lifetime, making it an interesting option for both fixed installations and events.

Fast signal distribution

Our proprietary BarcoLink technology guarantees swift signal distribution between Barco's projectors and image processors. With BarcoLink, signals are distributed over a BNC coax cable, which is not only more durable but also enables you to lower your costs.

Barco's HDX series won an InAVation Award for Most InAVative Commercial projector.
