OPIS PRODUKTU

The X1.9 is a high-resolution 1.92mm pixel pitch LED display. Thanks to its high brightness (1,200 nit) and extremely small pixel pitch, this exciting product not only suits the needs of traditional LED tile markets, but also of new applications including control rooms and boardrooms. Because of its unmatched Infinipix™ video processing platform, mechanical design and front access capability, this LED tile excels in reliability, quality and easy maintenance. Furthermore, its fast setup time, minimal wiring, reduced tweaking and easy serviceability, make the X1.9 the ideal solution for any LED application.

Perfectly aligned images

The X1.9 creates uniform, high-quality images with accurate color depth at any brightness level - including low brightness. Thanks to its unique mechanical concept, the X1.9 ensures easy and accurate alignment without requiring on-site tweaking. Plus, it's equipped with the Barco Infinipix™ platform which enables unscaled resolutions up to 4K from a single source and full data redundancy.

Fast and simple setup

The X1.9's auto-alignment truss beam ensures zero stress and in combination with its seam compensation, this results in a truly seamless screen. This beam ensures that the displays are automatically balanced and aligned correctly. What's more, to further simplify its setup, the wiring required to install the X1.9 has been reduced to a minimum.
