Mitsubishi

OPIS PRODUKTU

Mitsubishi's Diamond Vision ODT16 LED screen offers outstanding image clarity and uniformity for outdoor fixed installation applications, whether displaying video, graphics or text.

For outdoor installations where a larger screen size is required, ODT16 is an excellent choice. With a 16 mm pixel pitch, Mitsubishi's unique black package gives the ODT16 a remarkable contrast level, showing deep black and outstanding colours as a result. The screen is rated accurately at 5,000 cd/m², which is sufficient for most outdoor applications in full, direct sunlight. ODT16 offers excellent viewing angles both horizontally and vertically, and colour integrity is maintained throughout the viewing cone - an essential factor for commercial and sports applications.

With Mitsubishi's own 3in1 pixel design, the minimum viewing distance is surprisingly short.

Mitsubishi's exclusive electrical and mechanical design represents a dramatic step forward in outdoor LED screen performance, as our unique technologies deliver unfaltering uniformity, seamless images and unmatched reliability. The construction is robust, yet lightweight and aesthetically pleasing, so integrating ODT16 into any environment should be very straightforward. Service access for maintenance is available from the front and the rear, giving you more flexibility to choose your screen location and enclosure design. The ODT16 is the preferred choice for many outdoor applications where quality cannot not be sacrificed.
