Producent **Mitsubishi**

OPIS PRODUKTU

Mitsubishi's Diamond Vision ODT6 LED screen offers superb image clarity and uniformity for outdoor fixed installation applications, whether displaying video, graphics or text.

At 6.67 mm pixel pitch, Mitsubishi's unique black package gives the ODT6 a phenomenal contrast level, showing deep black and superb colours as a result. The screen is rated accurately at 5,000 cd/m², which is ample for most outdoor applications in full, direct sunlight. ODT6 offers excellent viewing angles both horizontally and vertically, and colour integrity is maintained throughout the viewing cone - an important factor for commercial applications.

With colours resolved exceptionally close the screen with Mitsubishi's own 3in1 pixel design, the minimum viewing distance is extremely short. Mitsubishi's proprietary electrical and mechanical design represents a dramatic step forward in outdoor LED screen performance, as our unique technologies deliver unfaltering uniformity, seamless images and unrivaled reliability. The construction is sturdy and robust, yet lightweight and esthetically pleasing, so integrating ODT6 into any environment should be very straightforward. The ODT6 is set to continue as the preferred choice for outdoor applications where quality must not be sacrificed, even though pixel resolution and screen size may be dictated by local conditions.
