**SONY**

Nazwa **PCS-XG80 - HD Videoconferencing System**

Cena **29 618,40 zł**

Producent **Sony**

### OPIS PRODUKTU

This versatile, easy to use Videoconferencing system is ideal for general business communications as well as distance learning.

The compact, mainstream system includes a High Definition PTZ camera with 'BrightFace' technology for crisp images in any lighting conditions – even dimly lit rooms where a projector's being used.

Superb picture quality is partnered by clear, echo-free stereo audio so every participant can be seen and heard clearly.

Included with the HD video codec unit and camera are two microphones for stereo and a HDMI cable for easy connection to a video monitor, TV or display.

Also available, the PCS-XG80S is a 'standalone' version that does not include a PTZ camera. The PCS-XG80/9DS system bundle includes PCSA-DSG80 Data Solution Software for simultaneous sharing of HD video and presentations from a connected PC.

Set-up and operation are refreshingly straightforward. The supplied remote commander allows easy one-touch dialling from your contacts list. Conference participants can share smooth, clear video and voice together with presentations from your PC. A choice of screen layout options makes it easy to configure video conferencing and PC data displays just the way you want to. Voice-activated switching automatically detects who's speaking, displaying their picture as the main image alongside smaller images of other participants.

Optional software makes multi-point conferences are just as simple. The PCS-XG80 can be configured to communicate with up to five remote sites, including a mix of IP and ISDN connections. In addition, two main units can be cascaded to support a maximum of ten sites.
